**DRILLING INTERSECTS 0.70 g/t GOLD OVER 91 meters  
 AT ALMADEN'S CABALLO BLANCO PROJECT, MEXICO**

Almaden Minerals Ltd. ("Almaden" or "the Company"; AMM:TSX; AAU:NYSE) is pleased to report to its shareholders the results contained in a news release of Goldgroup Mining Inc. (TSX:GGA; "Goldgroup"; see Goldgroup news release of April 20, 2011) in which Goldgroup announced the intersections tabularised below from the La Paila Zone of the Caballo Blanco Project and highlighted by the following intercepts:

**DDH 10 CBN 54: 91 m @ 0.70 Au (and 67 m @ 0.82 g/t Au)**  
**DDH 11 CBN 68: 134 m @ 0.61 g/t Au**  
**DDH 11 CBN 72: 122 m @ 0.80 g/t Au**

Goldgroup has an option to acquire a 70% interest in the Caballo Blanco project from Almaden which would be exercised with Goldgroup's current proposed 30,000 meter drill program. Almaden would then retain a 30% carried interest in the project, until a bankable feasibility study has been completed by Goldgroup. J.D. Poliquin, chairman of Almaden, commented, "We are very pleased to receive these new results from Goldgroup's ongoing drill program at Caballo Blanco. The Caballo Blanco and nearby El Cobre projects are both underexplored and highly prospective projects in our portfolio. We are excited with Goldgroup's plans for Caballo Blanco and look forward to reporting results as they are received."

<b>DIAMOND DRILLING - LA PAILA ZONE</b>				
<b>Diamond Drill Hole</b>	<b>Mineralization</b>			
	<b>From (m)</b>	<b>To (m)</b>	<b>Interval (m)</b>	<b>Au grade (g/t)</b>
10 CBN 54	15.20	106.25	91.05	0.70
and	122.25	128.25	6.00	0.30
and	150.25	217.05	66.80	0.82
10 CBN 61	79.10	117.10	38.00	0.42
and	129.10	229.10	100.00	0.33
and	259.10	267.10	8.00	0.58
11 CBN 68	37.00	171.00	134.00	0.61
11 CBN 69	29.80	203.80	174.00	0.45
and	241.00	257.00	16.00	0.32
11 CBN 70	22.00	151.50	129.50	0.49
11 CBN 72	56.00	178.00	122.00	0.80

Goldgroup also announced that holes 52, 53, 56, 58-60, 62-67, are reverse-circulation ("RC") drill holes and will not be reported until a full analysis and interpretation is completed. Also reported is that diamond drill hole 71 was abandoned in a fault zone above its target depth. Goldgroup's April 20<sup>th</sup> release also included a map showing the location of the above drillholes.

## **Assaying and Qualified Person**

Almaden has not reviewed the new data reported today which was taken from the April 20th, 2011 news release of Goldgroup. Goldgroup reports that its Caballo Blanco drill program is being conducted under the direct supervision Kevin Sullivan, B.Sc., MAusIMM and the Company's Vice President, Exploration and a qualified person, as defined by NI 43-101 and that Mr. Sullivan reviewed the technical information contained in the Goldgroup news release. Goldgroup also disclosed its assaying and quality control and quality assurance procedures in its news release as follows:

*After project geologists logged and marked the core, technicians cut the individual lengths with a diamond saw, then tagged the bags and secured them with security clips. The samples were then collected by Inspectorate America Corp. ("Inspectorate") and transported to their preparation facility at Durango, Mexico where they were dried and crushed to -150 mesh. The rejects remained with Inspectorate while the pulps were air couriered to Inspectorate's Richmond, BC, Canada facility and analyzed for gold by fire assay with Atomic Absorption ("AA") finish. In addition, a 30 element Inductively Coupled Plasma ("ICP") analysis (aqua regia digest) was conducted on all samples. A QA/QC program was implemented as part of the sampling procedure for the drill program. One standard, one blank or one duplicate was inserted per group of 15 samples sent the laboratory.*

## **About Almaden**

Almaden is a well-financed mineral exploration company working in North America. The company has assembled mineral exploration projects, including the Ixtaca Zone, through its grass roots exploration efforts. While the properties are largely at early stages of development they represent exciting opportunities for the discovery of significant gold and copper deposits as evidenced at Ixtaca. Currently six projects (Caldera, Caballo Blanco, Tropic, Nicoamen River, Matehuapil and Merit), are optioned to separate third parties who each have the right to acquire an interest in the respective project from Almaden through making certain payments and exploration expenditures. Four further projects are held in joint ventures. Almaden also holds a 2% NSR interest in 11 projects. Almaden's business model is to find and acquire mineral properties and develop them by seeking option agreements with others who can acquire an interest in a project by making payments and exploration expenditures. Through this means the company has been able to expose its shareholders to discovery and capital gain without the capital that would be required if the company were to have developed these projects without a partner. The company intends to expand this business model, described by some as prospect generation, by more aggressively exploring several of its projects including the Ixtaca Zone.

*Neither the Toronto Stock Exchange (TSX) nor the NYSE AMEX have reviewed or accepted responsibility for the adequacy or accuracy of the contents of this news release which has been prepared by management. Statements contained in this news release that are not historical facts are forward looking statements as that term is defined in the private securities litigation reform act of 1995. Such forward-looking statements are subject to risks and uncertainties which could cause actual results to differ materially from estimated results. Such risks and uncertainties are detailed in the Company's filing with the Securities and Exchange Commission. Except for the statements of historical fact contained herein, certain information presented constitutes "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 and Canadian securities laws. Such forward-looking statements, including but not limited to, those with respect to potential expansion of mineralization, potential size of mineralized zone, and size and timing of exploration and development programs, estimated project capital and other project costs and the timing of submission and receipt and availability of regulatory approvals involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievement of Almaden to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others, risks related to international operations and joint ventures, the actual results of current exploration activities, conclusions of economic evaluations, uncertainty in the estimation of mineral resources, changes in project parameters as plans continue to be refined, environmental risks and hazards, increased infrastructure and/or operating costs, labour and employment matters, and government regulation and permitting requirements as well as those factors discussed in the section entitled "Risk Factors" in Almaden's Annual Information form and Almaden's latest Form 20-F on file with the United States Securities and Exchange Commission in Washington, D.C. Although Almaden has attempted to identify important factors that could cause actual results to differ materially, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements. Almaden disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, other than as required pursuant to applicable securities laws. Accordingly, readers should not place undue reliance on forward-looking statements.*
